SENSORY BOTTLE

Materials: a sensory bottle filled with small floating objects or coloured liquid bubbles.

1. Shake the bottle well so that its contents are all mixed up.

Imagine that the stirred-up bottle is like your mind when you are feeling stressed, angry or upset. Just like it is hard to see the contents of the bottle clearly, it is hard to think clearly when we are upset.

2. Place the bottle down on a table.

Watch what happens when the bottle is still for a few moments.

Notice how its contents begin to settle and the water clears. Our mind and our feelings work the same way. When we stop and are still for a little while, hard feelings feel less intense and we can see things more clearly.

Follow the falling objects or coloured bubbles with your eyes until every last one has settled at the bottom of the bottle.

 - over your heart.
4. Notice how quickly or slowly your heart is beating.
5. Think about your current feelings.
6. Without speaking, stand up and jump on the spot ten times.
7. Sit down and find your heartbeat again.

Do you think this feeling is connected to how quickly or slowly your heart is beating?

What changes do you notice? Is your heart beating faster or slower than you expected? Can you notice any change in your breath?

8. Close your eyes and focus on your heartbeat until it slows down again.
