

Science

Vision – ‘all things are possible’

At Benedict Biscop we want our children to learn that all things are possible. We want our children to aspire and to achieve highly. We want all children to have a strong understanding of the world around them whilst acquiring specific skills and knowledge to help them to think scientifically, to gain an understanding of scientific processes and also an understanding of the uses and implications of Science, today and for the future – BECOMING SCIENTISTS.

Characteristics of Scientist:

- The ability to think independently and raise questions about working scientifically and the knowledge and skills that it brings.
- Confidence and competence in the full range of practical skills, taking the initiative in, for example, planning and carrying out scientific investigations.
- Excellent scientific knowledge and understanding which is demonstrated in written and verbal explanations, solving challenging problems and reporting scientific findings.
- High levels of originality, imagination or innovation in the application of skills.
- The ability to undertake practical work in a variety of contexts.
- A passion for science and its application in past, present and future technologies.

At Benedict Biscop, scientific enquiry skills are embedded in each topic the children study and these topics are revisited and developed throughout their time at school. Topics, such as Plants, are taught in Key Stage One and studied again in further detail throughout Key Stage Two. This model allows children to build upon their prior knowledge and increases their enthusiasm for the topics whilst embedding this procedural knowledge into the long-term memory. All children are encouraged to develop and use a range of skills including observations, planning and investigations, as well as being encouraged to question the world around them and become independent learners in exploring possible answers for their scientific based questions. Specialist vocabulary for topics is taught and built up, and effective questioning to communicate ideas is encouraged. Concepts taught should be reinforced by focusing on the key features of scientific enquiry, so that pupils learn to use a variety of approaches to answer relevant scientific questions.

National Curriculum Aims

The national curriculum for science aims to ensure that all pupils:

- develop scientific knowledge and conceptual understanding through the specific disciplines of biology, chemistry and physics
- develop understanding of the nature, processes and methods of science through different types of science enquiries that help them to answer scientific questions about the world around them
- are equipped with the scientific knowledge required to understand the uses and implications of science, today and for the future.

Key Stage 1 Science

Pupils should be encouraged to:

- experience and observe phenomena
- look more closely at the natural and humanly-constructed world around them
- be curious and ask questions about what they notice
- develop their understanding of scientific ideas by using different types of scientific enquiry to answer their own questions, including observing changes over a period of time, noticing patterns, grouping and classifying things, carrying out simple comparative tests, and finding things out using secondary sources of information.
- use simple scientific language to talk about what they have found out and communicate their ideas to a range of audiences in a variety of ways.
- use of first-hand practical experiences, but there should also be some use of appropriate secondary sources, such as books, photographs and videos.

Working Scientifically must always be taught through and clearly related to the teaching of substantive science content in the programme of study.

Lower Key Stage 2 Science

Pupils should be encouraged to:

- explore, talk about, test and develop ideas about everyday phenomena and the relationships between living things and familiar environments
- develop their ideas about functions, relationships and interactions
- ask their own questions about what they observe and make some decisions about which types of scientific enquiry are likely to be the best ways of answering them, including observing changes over time, noticing patterns, grouping and classifying things, carrying out simple comparative and fair tests and finding things out using secondary sources of information.
- draw conclusions and use some scientific language, first, to talk about and, later, to write about what they have found out.

Upper Key Stage 2 Science

Pupils should be encouraged to:

- explore and talk about their ideas; ask their own questions about scientific phenomena; and analyse functions, relationships and interactions more systematically
- encounter more abstract ideas and begin to recognise how these ideas help them to understand and predict how the world operates
- recognise that scientific ideas change and develop over time
- select the most appropriate ways to answer science questions using different types of scientific enquiry, including observing changes over different periods of time, noticing patterns, grouping and classifying things, carrying out comparative and fair tests and finding things out using a wide range of secondary sources of information
- draw conclusions based on their data and observations, use evidence to justify their ideas, and use their scientific knowledge and understanding to explain their findings

Progression

To meet our curriculum aims, we have identified core strands of learning [generic learning objectives] which run throughout our curriculum. We have identified what this should look like at the end of key phases within the school [key skills demonstrated linked to working scientifically].

The curriculum is taught in a spiral design where learning is revisited and embedded – deepening learning and developing Mastery.

‘Working scientifically’ must be embedded within the content of biology, chemistry and physics, focusing on the key features of scientific enquiry, so that pupils learn to use a variety of approaches to answer relevant scientific questions. These types of scientific enquiry should include:

- observing over time; pattern seeking;
- identifying, classifying and grouping;
- comparative and fair testing (controlled investigations); researching using secondary sources.

Working Scientifically

Key generic learning objectives	KS1 working at the EXPECTED STANDARD	KS1 working ABOVE the expected standard	Lower KS2 working at the EXPECTED STANDARD	Lower KS2 working ABOVE the expected standard	Upper KS2 working at the EXPECTED STANDARD	Lower KS2 working ABOVE the expected standard
To generate ideas and ask questions Observe and explore to generate ideas, define problems and pose questions in order to develop investigations and products.	<ul style="list-style-type: none"> • ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> • ask their own questions about what their observations, developing why. 	<ul style="list-style-type: none"> • ask relevant questions and use different types of scientific enquiries to answer them 	<ul style="list-style-type: none"> • ask relevant questions and use different types of scientific enquiries to answer them, including variables 	<ul style="list-style-type: none"> • plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary 	<ul style="list-style-type: none"> • Independently plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary
To investigate, observe and record Engage safely in practical investigations and experiments and gather and record evidence by observation and measurement.	<ul style="list-style-type: none"> • observe closely, using simple equipment • perform simple tests • gather and record data to help in answering questions • use simple secondary sources to find answers 	<ul style="list-style-type: none"> • observe carefully and closely, using simple equipment • perform simple tests taking measurements • gather and record data to help in answering questions and begin to present it in an appropriate way • use simple secondary sources to find answers and develop further questions. 	<ul style="list-style-type: none"> • set up simple practical enquiries, comparative and fair tests • make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers • record findings using simple scientific language, drawings, 	<ul style="list-style-type: none"> • set up simple practical enquiries, comparative and fair tests, independently. • make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers, repeating results to discuss accuracy 	<ul style="list-style-type: none"> • take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate • record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs 	<ul style="list-style-type: none"> • take measurements, using a range of scientific equipment, with accuracy and precision, repeatability and reproducibility • record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs independently.

			labelled diagrams, keys, bar charts, and tables <ul style="list-style-type: none"> gather, record, classify and present data in a variety of ways to help in answering questions 	<ul style="list-style-type: none"> record findings using more complex scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to answer questions, justifying their answers. 		
To conclude ideas and concepts Communicate and model in order to explain and develop ideas, share findings and conclusions.	<ul style="list-style-type: none"> identify and classify use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> identify and classify, beginning to develop similarities and differences. use their observations and ideas to suggest answers to questions, giving simple reasons why. 	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes, justifying their reasoning. report on findings from enquiries, developing relationships. 	<ul style="list-style-type: none"> identify scientific evidence that has been used to support or refute ideas or arguments report and present findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations 	<ul style="list-style-type: none"> identify scientific evidence that has been used to support or refute ideas or arguments, beginning to suggest errors. report and present explanations from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations
To evaluate To continually make systematic evaluations when designing and making, to bring about improvements in processes and outcomes.			<ul style="list-style-type: none"> use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	<ul style="list-style-type: none"> use results to draw conclusions, make predictions for new values, suggest improvements and raise further justified questions 	<ul style="list-style-type: none"> use test results to make predictions to set up further comparative and fair tests describe and evaluate their own and other people's scientific ideas related to topics in the national curriculum (including ideas that have changed over time), using evidence from a range of sources 	<ul style="list-style-type: none"> use test results to identify further questions arising from their results describe and evaluate their own and other people's scientific ideas, separating opinion from fact

They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur and talk about changes. 	<p>LEGO</p> <ul style="list-style-type: none"> To describe the simple physical properties of a variety of everyday materials, by identifying the properties of plastic in the context of Lego. To use observations to suggest answers to questions, by thinking about why Lego is made out of plastic. <p>MAE JEMISON</p> <ul style="list-style-type: none"> To ask simple questions and use simple secondary sources to find answers, by role playing an interview with Mae Jemison <p>ZOOS- including local farms/ aquariums</p> <ul style="list-style-type: none"> To describe and compare the structure of a variety of common animals, by sorting animals according to their features To identify and classify animals, by sorting animals according to their features <p>SENSORY GARDEN</p> <ul style="list-style-type: none"> To identify and name a variety of common wild and garden plants, by exploring a range of sensory plants. To gather and record data to help in answering questions, by creating a chart showing the class' most popular sensory plants. <p>MEASURING THE WEATHER- use in school weather station/ BBC Newcastle to see where it is filmed.</p> <ul style="list-style-type: none"> To observe and describe weather associated with the seasons, by measuring rainfall with a rain gauge they have made 	<p>Plants Greenhouse Growing – Eden Project- Doxford community gardens</p> <ul style="list-style-type: none"> To find out how plants need water, light and a suitable temperature to grow and stay healthy in the context of exploring how plants grow in greenhouses, including in the biomes at the Eden Project. To find out how plants need water, light and a suitable temperature to grow and stay healthy in the context of comparing plant growth in and out of a greenhouse <p>Brilliant Botany – Jane Colden-Winter Gardens Preston Park</p> <ul style="list-style-type: none"> To identify and describe the basic structure of common flowering plants by observing and sketching a range of common plants. To observe closely using simple equipment by using a magnifying glass to sketch details of different plants. <p>Animals Including Humans Elizabeth Garrett Anderson-doctors surgery</p> <ul style="list-style-type: none"> To use their observations and ideas to suggest answers to questions in the context of considering whether doctors are scientists. To describe the importance for humans of exercise, of eating the right amounts of different types of food, and hygiene in the context of creating a poster for a doctor's surgery to explain how to stay healthy. <p>Louis Pasteur</p>	<p>Plants Joseph Banks</p> <ul style="list-style-type: none"> To identify differences, similarities or changes related to simple scientific ideas and processes by finding out about the men and women who introduced new plants to our gardens. To explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant by exploring the way that non-native plants have been discovered, transported and introduced. <p>George Washington Carver-Washington Old Hall</p> <ul style="list-style-type: none"> Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. To identify changes related to scientific ideas by describing the achievements of George Washington Carver. <p>Animals Including Humans Marie Curie- Hospital X-ray dept</p> <ul style="list-style-type: none"> To identify changes related to scientific ideas by describing Marie Curie's research into x-rays. To identify that humans have skeletons for support, protection and movement by identifying and explaining the bones shown in x-rays. <p>Rocks- Great North Museum for fossils and rocks. William Smith</p> <ul style="list-style-type: none"> Compare and group together different kinds of rocks on 	<p>Living Things and their Habitats Gerald Durrell</p> <ul style="list-style-type: none"> To recognise that environments can change and that this can sometimes pose dangers to living things by exploring Gerald Durrell's conservation work in Madagascar. To set up simple practical enquires and report on findings from enquires in the context of soil erosion and nutrient loss. <p>Sound Alexander Graham Bell</p> <ul style="list-style-type: none"> To recognise that vibrations from sounds travel through a medium to the ear in the context of Alexander Graham Bell's invention of the telephone. To report on findings, including oral and written presentations and displays in the context of Alexander Graham Bell's invention of the telephone. <p>States of Matter Maria Telkes</p> <ul style="list-style-type: none"> Make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers in context of building a solar oven. <p>Electricity Garrett Morgan</p>	<p>Living Things and their Habitats David Attenborough- Current News Issues linked in</p> <ul style="list-style-type: none"> To find out about the work of naturalists and animal behaviourists in the context of the life and work of David Attenborough. <p>Properties of Materials CSI- Police visit for investigations</p> <ul style="list-style-type: none"> To identify scientific evidence that has been used to support or refute ideas or arguments in the context of how CSI technicians use evidence to solve crimes. To use knowledge of solids, liquids and gases to decide how mixtures might be separated in the context of using chromatography to solve a 'crime'. <p>Earth and Space- Kielder observatory Margaret Hamilton</p> <ul style="list-style-type: none"> To describe how scientific ideas have changed over time in the context of Margaret Hamilton's development of the software for the Apollo Moon missions. <p>Stonehenge</p> <ul style="list-style-type: none"> To identify scientific evidence that has been used to support or refute ideas in the context of the theories surrounding the alignment of the stones at Stonehenge. <p>Animals including Humans</p>	<p>Living things and their habitats- Libbie Hyman</p> <ul style="list-style-type: none"> To give reasons for classifying plants and animals based on specific characteristics in the context of Libbie Hyman's work on classifying vertebrates and invertebrates. <p>Animals Including Humans – Marie Maynard Daly –NHS-school nurses</p> <ul style="list-style-type: none"> To recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function in the context of exploring Marie Maynard Daly's findings on diet and heart-health. <p>Alexander Fleming</p> <ul style="list-style-type: none"> To record data using scatter graphs in the context of Fleming's discovery of penicillin. <p>Dr Daniel Hale Williams-Heart Start</p> <ul style="list-style-type: none"> To identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood in the context of finding out about Dr Daniel Hale Williams, then labelling the parts and functions of the circulatory system. <p>Mary Leakey- Evolution and Inheritance- linked into RE.</p> <ul style="list-style-type: none"> To recognise that living things have changed over time and that fossils provide information about living things that inhabited the

		<ul style="list-style-type: none"> To gather and record data to help in answering questions, by measuring rainfall with a rain gauge they have made. <p>AT THE VETS- get a vet into school or visit vets</p> <ul style="list-style-type: none"> To describe and compare the structure of a variety of common animals, including pets, by exploring the work of vets. To identify and classify, by identifying the basic parts of animals' bodies 	<ul style="list-style-type: none"> To describe the importance of hygiene to humans in the context of investigating Louis Pasteur's work on how germs spread. To use their observations and ideas to answer simple question in the context of investigating how germs spread and the effect of hand washing. <p>Materials- Charles Macintosh</p> <ul style="list-style-type: none"> To find out about people who have developed new materials in the context of learning about Charles Macintosh To identify and compare the suitability of a variety of everyday materials for particular uses in the context of testing materials to find the most suitable material for a waterproof coat. <p>Living Things and Their Habitats Rachel Carson- West Boldon Lodge</p> <ul style="list-style-type: none"> To describe how animals obtain their food from plants and other animals, using the idea of a simple food chain in the context of exploring Rachel Carson's study of the ocean. To observe closely, using simple equipment in the context of investigating the effects of pesticides in water, as researched by Rachel Carson. 	<p>the basis of their appearance and simple physical properties; describe in simple terms how fossils are formed when things that have lived are trapped within rock by exploring William Smith's principle of fossil succession.</p> <p>Inge Lehmann</p> <ul style="list-style-type: none"> To compare and group together different kinds of rocks on the basis of their appearance and simple physical properties by finding out about Inge Lehmann's discovery of Earth's solid core and how this creates igneous rocks. <p>Light Arthur James Wilson</p> <ul style="list-style-type: none"> To notice that light is reflected from surfaces by investigating concave and convex mirrors. To ask relevant questions and use evidence from scientific enquiries to answer them and support findings by investigating concave and convex mirrors. To gather, record, classify and present data in a variety of ways to help in answering questions by investigating concave and convex mirrors. 	<ul style="list-style-type: none"> Construct a simple series electrical circuit, identifying and naming the basic parts, including cells, wires, bulbs, switches and buzzers. Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit in context of creating a traffic light. <p>Thomas Edison- Newcastle and Cragside</p> <ul style="list-style-type: none"> To identify changes related to scientific ideas and processes by exploring Thomas Edison's work with electricity locally and nationally. To identify common electrical appliances that run on electricity by exploring Thomas Edison's work with electricity. <p>States of matter Joseph Priestley</p> <ul style="list-style-type: none"> To compare and group materials together according to whether they are solids, liquids or gases by exploring the discovery of oxygen. To identify changes relating to simple scientific ideas and processes by exploring the discovery of oxygen and the theory of phlogiston. <p>Kelvin- Absolute Zero- Life Centre</p> <ul style="list-style-type: none"> To observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) by exploring Kelvin's discovery of absolute zero. To take accurate measurements using 	<p>Eva Crane- Washington Old Hall</p> <ul style="list-style-type: none"> To describe the life process of reproduction in some plants and animals in the context of Eva Crane's research into the life cycle of bees. 	<p>Earth millions of years ago in the context of Mary Leakey's fossil findings in the Olduvai Gorge.</p> <p>Electricity Steve Jobs- Apple store</p> <ul style="list-style-type: none"> To use recognised symbols when representing a simple circuit in a diagram in the context of the invention of Apple computers and the life of Steve Jobs.
--	--	--	---	---	---	--	--

					standard units and a range of equipment, including thermometers by comparing the Kelvin scale with Celsius.

BENEDICT BISCOP

C.E. ACADEMY

KNOWLEDGE AND SKILLS BY TOPIC & YEAR GROUP

*note red are end of Key Stage objectives

YEAR 1

AUTUMN	Scientific Knowledge	Key generic learning objectives	KS1 working at the EXPECTED STANDARD	KS1 working ABOVE the expected standard
Materials	<ul style="list-style-type: none"> distinguish between an object and the material from which it is made identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock describe the simple physical properties of a variety of everyday materials compare and group together a variety of everyday materials on the basis of their simple physical properties. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> ask their own questions about what their observations, developing why.
		To investigate, observe and record	<ul style="list-style-type: none"> observe closely, using simple equipment perform simple tests gather and record data to help in answering questions use simple secondary sources to find answers 	<ul style="list-style-type: none"> observe carefully and closely, using simple equipment perform simple tests taking measurements gather and record data to help in answering questions and begin to present it in an appropriate way use simple secondary sources to find answers and develop further questions.
		To conclude ideas and concepts	<ul style="list-style-type: none"> identify and classify use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> identify and classify, beginning to develop similarities and differences. use their observations and ideas to suggest answers to questions, giving simple reasons why.
Seasonal change/weather (Autumn/ Winter)	<ul style="list-style-type: none"> observe changes across the four seasons observe and describe weather associated with the seasons and how day length varies 	To evaluate		
Scientists and Inventors				

SPRING	Scientific Knowledge	Key generic learning objectives	KS1 working at the EXPECTED STANDARD	KS1 working ABOVE the expected standard
Animals including humans	<ul style="list-style-type: none"> identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> ask their own questions about what their observations, developing why.
		To investigate, observe and record	<ul style="list-style-type: none"> observe closely, using simple equipment perform simple tests gather and record data to help in answering questions use simple secondary sources to find answers 	<ul style="list-style-type: none"> observe carefully and closely, using simple equipment perform simple tests taking measurements gather and record data to help in answering questions and begin to present it in an appropriate way use simple secondary sources to find answers and develop further questions.
Habitats of Animals	<ul style="list-style-type: none"> understand how to take care of animals taken from their local environment and the need to return them safely after study. use the local environment throughout the year to explore and answer questions about animals in their habitat. 	To conclude ideas and concepts	<ul style="list-style-type: none"> identify and classify use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> identify and classify, beginning to develop similarities and differences. use their observations and ideas to suggest answers to questions, giving simple reasons why.

			To evaluate	
SUMMER	Scientific Knowledge	Key generic learning objectives	KS1 working at the EXPECTED STANDARD	KS1 working ABOVE the expected standard
Plants	<ul style="list-style-type: none"> identify and name a variety of common wild and garden plants, including deciduous and evergreen trees identify and describe the basic structure of a variety of common flowering plants, including trees. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> ask their own questions about what their observations, developing why.
		To investigate, observe and record	<ul style="list-style-type: none"> observe closely, using simple equipment perform simple tests gather and record data to help in answering questions use simple secondary sources to find answers 	<ul style="list-style-type: none"> observe carefully and closely, using simple equipment perform simple tests taking measurements gather and record data to help in answering questions and begin to present it in an appropriate way use simple secondary sources to find answers and develop further questions.
Seasonal change/weather (Spring/ Summer) Scientists and Inventors	<ul style="list-style-type: none"> observe changes across the four seasons observe and describe weather associated with the seasons and how day length varies <p><i>Choose at least two scientists/inventors to look at in detail (see Science and Inventors progression overview for possible objectives).</i></p>	To conclude ideas and concepts	<ul style="list-style-type: none"> identify and classify use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> identify and classify, beginning to develop similarities and differences. use their observations and ideas to suggest answers to questions, giving simple reasons why.
		To evaluate		

YEAR 2

AUTUMN	Scientific Knowledge	Key generic learning objectives	KS1 working at the EXPECTED STANDARD	KS1 working ABOVE the expected standard
Plants	<ul style="list-style-type: none"> observe and describe how seeds and bulbs grow into mature plants find out and describe how plants need water, light and a suitable temperature to grow and stay healthy. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> ask their own questions about what their observations, developing why.
		To investigate, observe and record	<ul style="list-style-type: none"> observe closely, using simple equipment perform simple tests gather and record data to help in answering questions use simple secondary sources to find answers 	<ul style="list-style-type: none"> observe carefully and closely, using simple equipment perform simple tests taking measurements gather and record data to help in answering questions and begin to present it in an appropriate way use simple secondary sources to find answers and develop further questions.
Living Things	<ul style="list-style-type: none"> Explore and compare the differences between things that are living, dead, and things that have never been alive. Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food. 	To conclude ideas and concepts	<ul style="list-style-type: none"> identify and classify use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> identify and classify, beginning to develop similarities and differences. use their observations and ideas to suggest answers to questions, giving simple reasons why.
		To evaluate		

SPRING	Scientific Knowledge	Key generic learning objectives	KS1 working at the EXPECTED STANDARD	KS1 working ABOVE the expected standard
Habitats	<ul style="list-style-type: none"> Identify and name a variety of plants and animals in their habitats, including microhabitats identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> ask their own questions about what their observations, developing why.
		To investigate, observe and record	<ul style="list-style-type: none"> observe closely, using simple equipment perform simple tests gather and record data to help in answering questions use simple secondary sources to find answers 	<ul style="list-style-type: none"> observe carefully and closely, using simple equipment perform simple tests taking measurements gather and record data to help in answering questions and begin to present it in an appropriate way use simple secondary sources to find answers and develop further questions.
Animals including humans	<ul style="list-style-type: none"> notice that animals, including humans, have offspring which grow into adults find out about and describe the basic needs of animals, including humans, for survival (water, food and air) describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene. 	To conclude ideas and concepts	<ul style="list-style-type: none"> identify and classify use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> identify and classify, beginning to develop similarities and differences. use their observations and ideas to suggest answers to questions, giving simple reasons why.
		To evaluate		

SUMMER	Scientific Knowledge	Key generic learning objectives	KS1 working at the EXPECTED STANDARD	KS1 working ABOVE the expected standard
Materials	<ul style="list-style-type: none"> identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> ask their own questions about what their observations, developing why.
		To investigate, observe and record	<ul style="list-style-type: none"> observe closely, using simple equipment perform simple tests gather and record data to help in answering questions use simple secondary sources to find answers 	<ul style="list-style-type: none"> observe carefully and closely, using simple equipment perform simple tests taking measurements gather and record data to help in answering questions and begin to present it in an appropriate way use simple secondary sources to find answers and develop further questions.
Scientists and Inventors	<i>Choose at least two scientists/inventors to look at in detail (see Science and Inventors progression overview for possible objectives).</i>	To conclude ideas and concepts	<ul style="list-style-type: none"> identify and classify use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> identify and classify, beginning to develop similarities and differences. use their observations and ideas to suggest answers to questions, giving simple reasons why.
		To evaluate		

AUTUMN	Scientific Knowledge	Key generic learning objectives	Lower KS2 working at the EXPECTED STANDARD	Lower KS2 working ABOVE the expected standard
Plants	<ul style="list-style-type: none"> identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant investigate the way in which water is transported within plants explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them 	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them, including variables
		To investigate, observe and record	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to help in answering questions 	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests, independently. make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers, repeating results to discuss accuracy record findings using more complex scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to answer questions, justifying their answers.
Animals including humans	<ul style="list-style-type: none"> identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat identify that humans and some other animals have skeletons and muscles for support, protection and movement. 	To conclude ideas and concepts	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes, justifying their reasoning. report on findings from enquiries, developing relationships.
		To evaluate	<ul style="list-style-type: none"> use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	<ul style="list-style-type: none"> use results to draw conclusions, make predictions for new values, suggest improvements and raise further justified questions

SPRING	Scientific Knowledge	Key generic learning objectives	Lower KS2 working at the EXPECTED STANDARD	Lower KS2 working ABOVE the expected standard
Rocks	<ul style="list-style-type: none"> compare and group together different kinds of rocks on the basis of their appearance and simple physical properties describe in simple terms how fossils are formed when things that have lived are trapped within rock recognise that soils are made from rocks and organic matter. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them 	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them, including variables
		To investigate, observe and record	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to help in answering questions 	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests, independently. make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers, repeating results to discuss accuracy record findings using more complex scientific language, drawings,

				labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to answer questions, justifying their answers.
Forces and magnets	<ul style="list-style-type: none"> compare how things move on different surfaces notice that some forces need contact between two objects, but magnetic forces can act at a distance observe how magnets attract or repel each other and attract some materials and not others compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials describe magnets as having two poles predict whether two magnets will attract or repel each other, depending on which poles are facing. 	To conclude ideas and concepts	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes, justifying their reasoning. report on findings from enquiries, developing relationships.
		To evaluate	<ul style="list-style-type: none"> use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	<ul style="list-style-type: none"> use results to draw conclusions, make predictions for new values, suggest improvements and raise further justified questions

SUMMER	Scientific Knowledge	Key generic learning objectives	Lower KS2 working at the EXPECTED STANDARD	Lower KS2 working ABOVE the expected standard
Light	<ul style="list-style-type: none"> recognise that they need light in order to see things and that dark is the absence of light notice that light is reflected from surfaces recognise that light from the sun can be dangerous and that there are ways to protect their eyes recognise that shadows are formed when the light from a light source is blocked by an opaque object find patterns in the way that the size of shadows change. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them 	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them, including variables
		To investigate, observe and record	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to help in answering questions 	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests, independently. make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers, repeating results to discuss accuracy record findings using more complex scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to answer questions, justifying their answers.
Scientists and Inventors	<i>Choose at least two scientists/inventors to look at in detail (see Science and Inventors progression overview for possible objectives).</i>	To conclude ideas and concepts	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes, justifying their reasoning. report on findings from enquiries, developing relationships.
		To evaluate	<ul style="list-style-type: none"> use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	<ul style="list-style-type: none"> use results to draw conclusions, make predictions for new values, suggest improvements and raise further justified questions

YEAR 4

AUTUMN	Scientific Knowledge	Key generic learning objectives	Lower KS2 working at the EXPECTED STANDARD	Lower KS2 working ABOVE the expected standard
Animals including humans	<ul style="list-style-type: none"> describe the simple functions of the basic parts of the digestive system in humans identify the different types of teeth in humans and their simple functions construct and interpret a variety of food chains, identifying producers, predators and prey. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them 	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them, including variables
		To investigate, observe and record	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to help in answering questions 	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests, independently. make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers, repeating results to discuss accuracy record findings using more complex scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to answer questions, justifying their answers.
Electricity	<ul style="list-style-type: none"> identify common appliances that run on electricity construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit recognise some common conductors and insulators, and associate metals with being good conductors. 	To conclude ideas and concepts	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes, justifying their reasoning. report on findings from enquiries, developing relationships.
		To evaluate	<ul style="list-style-type: none"> use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	<ul style="list-style-type: none"> use results to draw conclusions, make predictions for new values, suggest improvements and raise further justified questions

SPRING	Scientific Knowledge	Key generic learning objectives	Lower KS2 working at the EXPECTED STANDARD	Lower KS2 working ABOVE the expected standard
All living things	<ul style="list-style-type: none"> recognise that living things can be grouped in a variety of ways explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment recognise that environments can change and that this can sometimes pose dangers to living things. 	To generate ideas and ask questions	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them 	<ul style="list-style-type: none"> ask relevant questions and use different types of scientific enquiries to answer them, including variables
		To investigate, observe and record	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers 	<ul style="list-style-type: none"> set up simple practical enquiries, comparative and fair tests, independently. make systematic and careful observations and, where appropriate, take accurate measurements using

			<ul style="list-style-type: none"> and data loggers record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to help in answering questions 	<p>standard units, using a range of equipment, including thermometers and data loggers, repeating results to discuss accuracy</p> <ul style="list-style-type: none"> record findings using more complex scientific language, drawings, labelled diagrams, keys, bar charts, and tables gather, record, classify and present data in a variety of ways to answer questions, justifying their answers.
States of matter	<ul style="list-style-type: none"> compare and group materials together, according to whether they are solids, liquids or gases observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. 	To conclude ideas and concepts	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> identify differences, similarities or changes related to simple scientific ideas and processes, justifying their reasoning. report on findings from enquiries, developing relationships.
		To evaluate	<ul style="list-style-type: none"> use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	<ul style="list-style-type: none"> use results to draw conclusions, make predictions for new values, suggest improvements and raise further justified questions
